

## 25 LANDSCAPE COLOR PALETTES

These 25 color palettes have been taken from beautiful landscape photography from around the world.

### 25 COLOR PALETTES for natural landscapes.

These photos capture the amazing colors that can be found in nature, some in awe-inspiring locations that many of will never see, and others in scenery that we've seen before but have taken for granted. The top row of 25 colors are COOL, the bottom 25 are WARM.

### **ASSIGNMENT overview:**

You will complete a landscape acrylic painting using one of these 25 color palettes shown above, grouped to 5 per image.

Using your knowledge of the color theory assignment we just completed, select a palette and use either warm or cool colors for your painting.

Select a source image, it can be a landscape, seascape or cityscape. I would encourage you to select THREE or more source images that we can discuss as options. I would suggest using photos you may already have on your camera roll if you enjoy capturing the world around you. NO PEOPLE!

\*\*The image you select does not need to have the color palette you select, you can change it instead to use one of the color palette schemes above.
