

SCULPTURE & DESIGN

Designing with Numbers

Your Task: Design a unique number set using the year of your high school graduation as the subject. This design could be used for a t-shirt, project graduation design or the basis for your own unique invitation. IF you chose, you may also incorporate lettering (WSR, graduate, etc) into your artwork.

For starters, check out a few links that are based on number design:

1- <http://designofnumbers.com/>

2- <http://designbeep.com/2010/05/31/55-meaningful-and-inspiring-logo-designs-created-using-numbers/>

3- <http://www.denzomag.com/2010/11/logo-design-ideas-numbers-in-logos/>

Process: Take time to do a series of sketches with “2015,” “2016,” etc. Try to vary the size and shape of the numbers, interlock, stack or overlap. You can also use the numbers written in text, not just numeric.

After doing a series of thumbnail sketches, chose a minimum of FIVE quality designs that you consider to be a strong possibility for your final ink-up.

You will have until the last day of class to finish this project, so take time to let your design evolve!
